ULTREX[®] FIBERGLASS
REPLACEMENT WINDOWS AND DOORS

From Our Family to Yours

Extending Trust with the Marvin® Name

A different kind of company

Nearly a century of innovation and uncompromising product performance standards: that's the legacy of Marvin Windows and Doors. We are a family-owned company that has always believed in using the finest materials to create exceptional products, then backing them up with first-rate service.

As a result, our windows and doors have earned a solid reputation for superior quality, fine craftsmanship, and long-lasting performance.

The bottom line is customers trust the Marvin name because it means a quality product backed by service.

Today, third- and fourth-generation Marvins remain actively involved in the company and continue a strong commitment to our customers, communities, employees, and products.

Recognizing a need for non-wood replacement windows for discerning homeowners like you, Marvin created *Infinity*®, a revolutionary line of replacement products developed with the expertise of an industry leader.

"Thank you for considering Infinity from Marvin for your replacement project. We take pride in producing the highest-quality, longest-lasting windows and doors and providing you a simple, hassle-free replacement experience."

Infinity[®] from Marvin[®]

Building on Decades of Experience

An idea is born

The origin of *Infinity from Marvin* came from a simple idea: Marvin had a long history of making some of the very best wood and wood/clad windows and doors available. Why not introduce a non-wood product line that is low-maintenance and offers superior appearance and performance?

Marvin has used Ultrex[®] fiberglass components since the early 1990s, and recognized its superior characteristics of low-maintenance, durability, strength, and energy efficiency.

So the idea was developed further; Marvin took designers with decades of experience and asked them to design a window line specifically for your replacement project needs. The line would combine low-maintenance Ultrex fiberglass with the look of traditional windows, and be made in custom sizes and options for every replacement project need.

Finally, Marvin decided that the line should be presented to the market by professional replacement experts who handle the entire process seamlessly from initial consultation all the way through installation. Simple and hassle free for you.

And so an idea was born... *Infinity from Marvin*.

The Infinity team takes pride in producing the highest quality replacement windows and doors. In addition to being long-lasting and energy-efficient, all Infinity products are made in America.

MADE IN AMERICA. 

Why over 75,000 satisfied homeowners prefer Infinity Replacement Windows

- 1 Weathertight — provides year-round comfort wherever you live.
- 2 Super Durable Ultrex® — the ideal window material means virtually no maintenance for you.
- 3 Energy Efficient — ENERGY STAR® qualified products help save money on heating and cooling costs.
- 4 Better Looking — thoughtful design and traditional detailing not found in other replacement windows.
- 5 No-hassle shopping experience — from a reputable local installing retailer.
- 6 Easy to Clean — advanced designs make cleaning worries a thing of the past.
- 7 Limited Lifetime Warranty — brings you peace of mind.
- 8 Founded by Marvin® Windows and Doors — an industry leader for nearly a century.

Our Hassle-Free Experience

An Unmatched Experience with the Experts

Infinity® makes your entire replacement window and door project simple and hassle-free. In fact, our independent *Infinity* retailers offer a one-stop shopping experience, providing knowledgeable expertise from initial consultation all the way through full-service delivery and installation.

Infinity's simple 4-step process

- 1 A local expert will give you a thorough in-home consultation or showroom tour of *Infinity* products and services.

- 2 A window professional will measure your existing windows and doors for accurate replacement specification.

- 3 You'll then receive a detailed project quote that you can review with your retailer and have all your questions answered.

- 4 Removal of your old windows and doors is followed by convenient and professional installation of your custom replacement windows and a thorough clean-up of the area.

Best of all, you'll have peace of mind with the *Infinity* Limited Lifetime Warranty.

Our local experts make a difference

Infinity from Marvin® independent retailers are hand selected for their expertise and decades of experience in your local market. *Infinity* retailers live and work in your communities, and will treat you like a neighbor.

Benefits of working with your local *Infinity* retailer:

- Many *Infinity* retailers are local, family-run enterprises that give back to your community. Their reputation and future business rely on your 100% satisfaction.
- *Infinity* retailers have decades of experience in your market. They understand your unique local codes, requirements, and installation needs.
- If the need arises, you can often speak directly to the retailer's owner.
- *Infinity* retailers create good jobs and support your local economy.
- *Infinity* retailers are available to support the Limited Lifetime Warranty should the need arise.

“At Home Exteriors by Callen, we appreciate our relationship with *Infinity* because we are both family owned and operated businesses. We share the same commitment to our customers, communities, and employees.”

INFINITY
from **MARVIN**
REPLACEMENT WINDOWS

Installation Options

The Best Fit for Your Home

“Our *Infinity* retailer handled the entire process for us from start to finish. It was truly hassle-free.”

Lee & Ray D.

Depending on the age and style of your home, *Infinity*® offers two window replacement methods. Both methods are designed for maximum efficiency and minimal disruption to your home.

Option 1: Insert replacement

This replacement method is used when your existing window frames are in good condition, but the sash need replacement. Our frame-in-frame insert design is installed into your existing window frame with no disruption to existing trim, interior walls, or exterior siding.

This method is fast, efficient, more economical, and there is no finishing required on your part.

Option 2: Full-frame replacement

This installation method is appropriate when your entire window has deteriorated and needs replacement or if you are looking for a totally new window size, style, or appearance. With full-frame replacement, the entire window (sash, frame, and casing) is removed and replaced.

Built for life®

Every *Infinity* product is backed by the *Infinity* Limited Lifetime Warranty. It's our pledge to you that we will stand behind our products for as long as you own them.

For full details on our Limited Lifetime Warranty, see infinitywindows.com.

“After we replaced our windows with *Infinity*, our utility bill was so low the utility company came by our house because they were sure our meter was broken!”

Randy & Lynn S.

“With *Infinity from Marvin*® I got everything I wanted... low-maintenance fiberglass, easy cleaning features, and even more daylight and better views. I wish every decision was this easy.” Kathy B.

Ultrex® Fiberglass

Our Superior Material

ULTREX FIBERGLASS IS
8X STRONGER
THAN VINYL AND THE
TENSILE STRENGTH OF
ONE SQUARE INCH CAN
SUPPORT 41,000 POUNDS.*

Ultrex fiberglass — a superior material

Infinity® replacement windows and doors are made from Ultrex fiberglass — a pultruded fiberglass material so strong and durable it is superior to other window materials. Best of all, it makes *Infinity* products virtually maintenance free.

Created for strength and beauty

Our patented process starts with strong cables of glass that are saturated with specially compounded resins, pulled through a heated die, and cut with diamond-edge blades. Below are the steps Ultrex goes through from forming and curing all the way to the cutting stage. All of these steps create a remarkably durable material that outlasts and outperforms other window materials.

38%

FIBERGLASS WINDOWS HAVE
A **38% LONGER** USEFUL LIFE
EXPECTANCY THAN VINYL.**

Advantages of Ultrex fiberglass

- Low maintenance
- Base material is silica sand — an abundant natural resource
- Intricate profiles replicate the look of traditional wood windows
- Low expansion provides easy operation for the life of the window
- Strength keeps windows square and true
- Narrow profiles allow for more visible glass area and expanded views
- Long-term stability reduces the risk of seal failures and air leakage through the window
- Patented, mechanically bonded inline acrylic finish is up to 3x thicker than competitive finishes, providing superior resistance to discoloring, scratching, and denting

* Stiffness of the material to perform as designed. This stiffness is the flexural modulus of the material and is expressed in pounds per square inch.

** "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

Ultrex[®] Strength

The Strongest Choice for Window and Door Replacement

Durability for a lifetime

Ultrex is as strong as low carbon steel and 8x stronger than vinyl. It's so tough, we have to use diamond-edge blades just to cut it to size. The strength of Ultrex translates into superior stability, long-term ease of operation, low maintenance, and superior performance.

Strength for an expanded view

Take a moment to look at the images below. The *Infinity* view is expanded — how? The superior strength of Ultrex also allows for a narrower window frame profile and more glass area than other replacement windows, giving you more daylight and better views.

The view through vinyl replacement windows

The view through Infinity replacement windows

Ultrex[®] Performance

Durable and Low Maintenance

Nothing holds true like Ultrex fiberglass from 350°F to -30°F

Cold, heat and time — no worries

Ultrex resists the ravages of cold, heat, time and pressure to provide the most worry-free windows and doors available today. While vinyl can distort in extreme heat or streak and crack in fluctuating temperatures, *Infinity*[®] products offer the highest level of performance and are virtually maintenance free.

Low thermal expansion means a stronger seal

Comparison of expansion and contraction

Ultrex has an extremely low thermal expansion rate, which keeps the window stable and weathertight, reducing the risk of seal failures and air leakage into your home.

Tired of windows that are difficult to operate?

The low expansion of Ultrex means Infinity Windows resist sticking, swelling, and warping, providing easy operation for the life of the window.

Tired of high-maintenance windows?

The low expansion of Ultrex means Infinity's patented finish stays looking like new and is virtually maintenance free. It resists discoloring, warping, rotting, corrosion, denting, rust and doesn't require sanding, scraping, or painting.

Ultrex[®] Appearance

Superior Design with a Superior Finish

Better looking inside and out

Our nearly 20 years of experience with Ultrex allows us to create products with intricate details. Drawing on the decades of experience from Marvin[®] Windows and Doors, Infinity products incorporate the details of traditional wood windows without the maintenance.

The difference is in the details

Vinyl windows can arrive with messy welded corners, and bulky profiles that reduce your view. *Infinity* windows arrive with clean mechanically-bonded corners, traditional details, and narrow profiles to maximize your view.

Vinyl Competitor

Infinity

A superior finish that outlasts the competition

Our patented, mechanically bonded finish is up to 3x thicker than competitive finishes. It provides superior resistance to scratching and UV degradation - even on darker colors.

The Ultrex coating system is AAMA 624-10 verified, meaning our commercial grade finish resists the harshest weather conditions mother nature offers; a claim our competitors can't match.

Fiberglass Competitor

Infinity

Fiberglass Competitor

Infinity

Infinity uses a patented, mechanically-bonded finish, compared to competitors' thin painted finish that can expose the rough fiberglass material.

*The automobile industry learned decades ago that acrylic lights outlast the painted finish of their vehicles. *Infinity* uses a similar acrylic finish to provide long-term color retention and durability.*

Energy Efficiency

Technology Brings Cool Savings

20%

INFINITY WINDOWS
WITH LO \bar{E} GLAZING CAN
REDUCE YOUR HEATING
AND COOLING BILLS BY
UP TO 20%.*

Energy Efficient, Sustainable Design

Ultrex[®] fiberglass is far less thermally conductive than aluminum (500x less!) and insulates much like wood. This means that Ultrex provides an insulating barrier against extreme weather temperatures, keeping your home comfortable, and helping to reduce heating and cooling costs.

Glazing Options

Lo \bar{E}^2 -272[®]: We know how important energy efficiency is, and our standard glass is a simple means of maximizing your home's thermal efficiency year round. Lo \bar{E}^2 -272[®] reflects heat back to its source so summer heat is reflected outdoor and indoor heating in the winter is retained. Lo \bar{E}^2 -272[®] also blocks up to 84% of UV rays to reduce fading and damage to upholstery and carpet.

Lo \bar{E}^3 -366[®]: Our optional Lo \bar{E}^3 -366[®] glass provides increased performance for high sun exposure locations. This top-performance glass is formulated to reject solar heat while letting light in. With Lo \bar{E}^3 -366[®], light and visibility are maximized, while up to 95% of the sun's damaging UV rays are blocked.

Lo \bar{E}^3 -366[®]/i89[™]: Our optional Lo \bar{E}^3 -366[®]/i89[™] combines the energy-efficient properties and UV protection of Lo \bar{E}^3 -366[®] with Lo \bar{E}^3 -366[®]/i89[™], an inside surface coating that immediately reflects escaping heat back into the room increasing comfort and energy efficiency.

Sustainable design and an investment that pays

Infinity[®] products have one of the highest performance ratings from the National Fenestration Rating Council (NFRC), the organization that defines energy performance ratings for the window and door industry.

Ultrex is made predominately of silica sand, a safe and abundant natural resource.

Our facilities eliminate 95% or more of VOCs (Volatile Organic Compounds).

* Compared to single pane, clear aluminum windows. Estimated savings are based on data set forth in Window Selection Tool of the Efficient Windows Collaborative, available at <http://efficientwindows.org>. Actual savings will vary by product type, location, method of installation, individual home characteristics, local climate and conditions, utility rates, and other factors.

85%

In cooler climates, Infinity windows with LoE³-366®/i89™ glazing reflect 85% of indoor heat back into the home versus 16% reflection of other LoE glass coatings.

The glass in Infinity products contain 22%-29% recycled content, and Ultrex® requires less embodied energy to produce than vinyl.

Infinity products are ENERGY STAR® qualified and are Hallmark certified.

*Fiberglass windows have a 38% longer useful life expectancy than vinyl.**

New windows can increase the resale value if you decide to sell your home.

* "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

EverWood® Engineered Finish

The Beauty of Wood, The Ease of EverWood

HAVE A MOISTURE PROBLEM?

EverWood is inorganic and moisture resistant*, so it requires virtually no maintenance.

Now you can enjoy the natural appearance of wood without all the maintenance. EverWood is an *Infinity*®-exclusive wood grain interior finish that can be stained to match your existing woodwork. It looks and feels like real wood, but doesn't require the sanding, scraping, or refinishing of wood.

Durable and low maintenance

Long-lasting EverWood is made from an inorganic material, so it won't absorb moisture or decay over time. That means there's virtually no warping, discoloration, material degradation, expansion, or contraction — just remarkably reliable performance and lasting beauty, year after year.

Together, EverWood and Ultrex® offer the ultimate in beautifully superior, low-maintenance replacement windows and doors.

Stains just like wood

In a few easy steps, this remarkable engineered wood grain finish takes stain just like wood. Thanks to its extreme durability, you'll enjoy the rich, natural look of wood for years to come.

Mahogany Stain on Natural Wood

Mahogany Stain on EverWood

Scan this QR code to learn more about the EverWood interior option.

* Submerged product photo is used for dramatic purposes only. EverWood is a moisture-resistant finish that is applied to *Infinity* products and does not make the product waterproof or prevent condensation. *Infinity* products should never be submerged in water.

Stain to match

EverWood® samples are provided with every window and make it easy to test for the right match. Now you can perfectly complement your home's existing woodwork with the warmth and beauty of EverWood.

Grilles and Divided Lites

Pattern Options for a Custom Look

Grilles-Between-the-Glass

With *Infinity*® from Marvin®, there is no such thing as a minor detail. We pay close attention to every aspect of our windows. So choose an option that complements the personality of your home. We'll take care of the details.

Grilles-Between-the-Glass

Infinity windows are available with 3/4" contoured grille bars between the panes of glass.* Grille bars facing the exterior match the window exterior color, and grille bars facing the interior are available in Stone White, Sierra, Satin Taupe and Bronze. Grilles-Between-the-Glass combine easy glass cleaning with the stunning detail of a grille pattern. It's the best of both worlds.

Simulated-Divided-Lites

Simulated-Divided-Lites

Choose Simulated-Divided-Lites for an authentic divided glass look. Simulated-Divided-Lite bars are permanently adhered to the exterior surfaces of the glass with a spacer bar between the panes of glass. Exterior Simulated-Divided-Lite bars are made of the same tough Ultrex® fiberglass used on all *Infinity* exteriors. Interior bars are available in Stone White, Sierra or stainable EverWood® to match your existing woodwork.

Divided Lite Patterns

Various divided lite patterns are available to replicate the look of your original windows or to add architectural interest.

Double Hung

The smart replacement choice

You've heard it said, "Don't work harder. Work smarter." With old Double Hung windows, you can work up a sweat just opening them and keeping them open. The *Infinity*® Double Hung is the smart answer to a traditional favorite. You'll be amazed at its smooth, effortless operation. Quality hardware and advanced design result in a Double Hung that is easy to clean from the interior of your home. Make the smart window choice and your "window worries" will become a thing of the past.

Easy tilt operation

Unlock and raise the sash slightly.

Press the tilt release button and slide the lock lever over the button.

Tilt the sash into the room for easy cleaning without screen removal.

Available in multiple assembly options

Casement and Awning

A versatile, user-friendly replacement option

One word describes *Infinity® from Marvin®* Casements and Awnings — easy. They are easy to choose, easy to operate and easy to love. The Casement (left- or right-hinged) and Awning (top-hinged) combine beauty and virtually effortless operation. The standard Easy Wash® hinge is just that — a design that lets you easily clean the window both inside and out. The optional Clear View® hinge provides for an optimal viewing area. Both Casements and Awnings feature folding handles that tuck conveniently out of the way of most window treatments and provide a clean, finished look.

REPLACEMENT WINDOWS

Glider

The operating sash slides effortlessly and can be removed and reinstalled for easy cleaning.

Available in various configurations

Triple-sash units are available with operating sash on both ends.

Triple-sash units are available in equal sash configuration.

Double-sash units are available in equal and unequal sash configurations.

A smooth operating space-saver

If your gliders don't "glide" anymore or you have a space where a swinging sash would be in the way, the *Infinity*® Glider is the perfect solution. The sash rollers allow this durable, energy-efficient window to operate effortlessly and seal tightly against air and water infiltration. Made with tough, dependable Ultrex® fiberglass inside and out, our Gliders are virtually maintenance free. You'll also appreciate the superior performance and energy efficiency provided by standard LoE²-272® with argon insulating glass. Cleaning the glass is simple with tilt latches that allow you to remove the operable sash for easy access.

This versatile *Infinity* Glider is the ideal answer when you're looking for simple operation, energy efficiency and reliable performance.
